COSOPAX/RGL Project Manager | 02 January 2016 - 30 January 2017

- Planning project activities and supervising their execution in order to achieve the desired results.
- Maintain close Diocese-donor collaboration (Catholic Relief Services).

PROJECTS

ITUNU

ITUNU is a digital tool that allows people to access mental health services through one-on-one text-based

sessions with counselors. As a backend engineer, I contributed to socket implementation and the Admin dashboard, which has more than 20 endpoints. NestJS, AWS S3, MongoDB, Swagger, REST API, GraphQL, sockets, and turn.io WhatsApp API are some of the technologies used to build this project.

<https://itunu.dashboard.cchub.info/>

LEARN

Learn.elimu is a platform that has more than 120,000 people visiting this website every month. My tasks were to convert the monolithic project into a microservice one by using parseHub and implementing user authentication. Some technologies used are: Django rest-framework, parseHub, PostgreSQL, Swagger, and Jest for testing.

<https://elimu.cchub.info/>

ADEIN

ADEIN: Africa Digital Epidemiology Innovation Network is a community that provides an opportunity for members to lend their expertise and resources, to collaborate and conduct research for various projects in epidemiology. It has been built by using AdonisJS, MySQL, GraphQL, 4 external Google spreadsheets and CSV datasets, Swagger, etc. My tasks were behavioral research on HIV and COVID-19 data for visualization.
